AFTER-CARE INSTRUCTIONS

AFTERCARE ADVICE

- Change your pillowcase when you get home. Please be advised that any pigment residue could stain your pillowcase for at least 1 week after your appointment.
- Day of the procedure: Lips will feel swollen, dark and very dry after your treatment. Pat lips gently with a wipe or tissue to remove excess lymph every hour or so on the first day. You may also apply ice packs to help if they are very swollen.
- Day 2-3: Apply a moisturizing lip ointment twice a day to moisten and prevent them from forming a crust. Allow lips to dry for 5 minutes prior to applying your aftercare lip balm. This should be done for at least 5-6 days post treatment.
- Day 4: Apply a moisturizing lip ointment at night to prevent scabs and dryness, continue to apply it for the entire week until the area is completely healed. Always use a Q-tip to apply the ointment. Once the lips are no longer tender, they may become flaky. This is normal.
- Do not pick or scratch them. Doing so can significantly reduce the amount of pigment that stays in the skin.

LIPS HEAL STAGES

DAY 1

Swelling, tenderness,
and high color intensity.

DAY 2

Swelling subsides, dryness
starts. Color too dark.

DAY 3-4

Scabbing and peeling.
Severe dryness.

DAY 5-6

More peeling possible.
Color looks much lighter.

DAY 7-10

Ghosting stage.
The color looks very light.

DAY 28

The color has settled into
its true shade.
